

The case for cloud-based deposition review

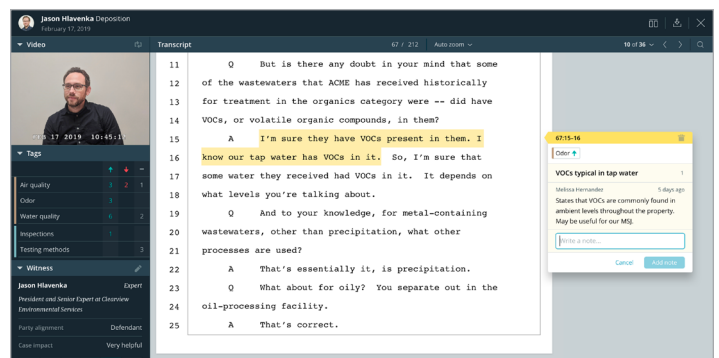

Stronger case development and trial strategy for a lower cost

DISCO Case Builder is a collaborative deposition management and review platform that enables teams to work faster and smarter. With Case Builder, you'll be able to:

- Easily discuss and analyze testimony **without exchanging dozens of emails.**
- Create deposition summaries for the team, experts, and clients in **less than half the time.**
- **Get new team members up to speed quickly** when they join the case.
- **Work anywhere** without needing to haul binders around.

Feature highlights

- **Search, identify, and use the best testimony** from across all depositions and work product in a single, cloud-based view.
- **Review video, transcripts, and exhibits together** to get a complete picture of deposition testimony.
- **Systemize witness assessment and selection** by building searchable witness profiles for future reference.
- **Eliminate costly expenses and tedious manual work** such as synchronizing videos to transcripts and formatting video evidence for presentation.
- **Add deposition testimony to motions instantly** by copy-pasting excerpts automatically formatted to Bluebook citation and style guidelines.

Simple pricing

DISCO Case Builder is priced to ensure cost consistency, certainty, and control for firms.

- Pricing is **based solely on number of users** — not data volume.
- User **licenses are fully transferable** and can be assigned to case team members, co-counsel, and clients.
- Pricing **includes data storage**, depositions, videos, synchronization, exhibits, witnesses, notes, and exports.
